Research interests

I am especially interested in (**a**) improving the learning of representations, and (**b**) leveraging these intermediate representations for controlling AI systems. My recent research focuses on controlling the diffusion generative process by exploiting latent representations or denoised estimates, with the goal of improving the conditional generative process and multi-modal representation alignment. Additionally, I am interested in learning robust representations against various distribution shifts.

- **Generative models**: Diffusion models and their applications (Editing, Conditional generation, Distillation, Inverse imaging, etc).
- **Multi-modal learning**: Text, Image, Video, 3D, etc.
- **Robust representation learning**: Adversarial training, Debiasing, etc.

Education

KAIST Daejeon, Korea
Ph.D., Bio & Brain Engineering 2022.03 - 2026.02 (Expected)
Advisor: Jong Chul Ye, Sang Wan Lee

KAIST Daejeon, Korea
MS, Bio & Brain Engineering 2019.03 - 2021.02
Advisor: Sang Wan Lee

KAIST Daejeon, Korea
BA in Bio & Brain Engineering, minor in Computer Science 2014.03 - 2019.02
GPA: 3.8 / 4.3 (Cum Laude)
